

***The low-cost solution
to high-cost crime***

DEFEND... DETER... DENY... DETECT

AFSCO

ELECTRIC FENCES

In today's world of ever increasing crime, businesses and people are looking for a cost-effective solution to halt property and personal losses. The **AFSCO Electric Fence** is a quality security system that works! It is both a visual and physical deterrent... and, of course, it is non-lethal.

AFSCO's Pulse Perimeter Fencing is a cost-effective physical and psychological barrier effortlessly guarding against intruders. The success of the **AFSCO** Pulse system is due in part to the psychological threat of receiving an electric shock of unknown severity.

Would-be intruders who come into contact with the **AFSCO** Electric Fence are repelled by a SHORT, SHARP, REGULATED, SAFE but PAINFUL electric shock. Any attempts to cut, load, short-circuit or tamper with the **AFSCO** Electric Fence are detected and alarms are generated.

Don't get shocked when you arrive at work... Let the burglars get shocked!

- Are you tired of spending money every month?
- Are you tired of getting broken into?
- Are your insurance rates going up?
- Do you want peace of mind at night?
- Do you want a safe environment for your family?
- Do you want to feel reassured that your property has dependable protection against crime?
- We can help you save time, money, and worry!

An electrified security fence is the ideal option for business and residential security!

Install the safest, most affordable, theft deterrent around... an Electric Perimeter Security Fence from AFSCO.

Compliance Certification

On completion, every **AFSCO** system is inspected for compliance with BSEN 60335 and **AFSCO's** Installation Standards and Code of Practice.

Standards for Safety and Security

All components used for the construction of **AFSCO** systems fully comply with all National and International Standards including BSEN 60335. In addition we have our own Installation Standards and Code of Practice. **AFSCO** systems are designed to be fail safe and secure.

Quality Assured – Accredited Dealer Network

To ensure that **AFSCO** systems are designed, installed and maintained to the appropriate standards, **AFSCO** systems are only available via our network of "**AFSCO** Accredited Dealers". Our dealers are contractually bound and trained in the design, installation and maintenance of **AFSCO** systems. Following completion of every **AFSCO** installation, the new system is inspected and, providing compliant, a "Certificate of Compliance" is issued. This method of supply ensures that all systems are installed to the highest standards for optimum safety, security and reliability.

AFSCO controls have an open system architecture to allow the electric fence to be easily interfaced with other security systems, for full remote monitoring and control, including remote arming, disarming, system status and alarm reporting by zone.

Easy Ordering

AFSCO will do all the work for your design and system configuration. Simply send us the site plan and we will have a quote, a component list, delivery time and site installation guide ready for you within 3 days.
